

ROBUST DATA MIGRATION SERVICE FOR MERGERS AND ACQUISITIONS IN THE O&G INDUSTRY

Digital Oil & Gas Solutions combines solid cloud computing and engineering expertise to support O&G business owners' merging and acquisition procedures. The company provides a multi-phased data cleansing approach for any acquisitions of firms and new assets. Digital Oil & Gas Solutions software platform performs health checks on source data, identifies blank fields, and sends results back to a source company. Thus, it assists with closing gaps in the required data.

Additionally, the service compares incoming data sets with existing information in target systems, whether it's a FlowCal, Wellview, or ERP of client's choice. Digital Oil & Gas Solutions is experienced in migrating AS400 mainframe and Client/Server systems, Access Databases, Spreadsheets, and many other O&G data platforms.

HOW SEAMLESS AND SAFE DATA MIGRATION FACILITATES BUSINESS CONTINUITY AND GROWTH

Digital Oil & Gas Solutions platform integrates with structured data sources from SQL- or Oracle-based tables, semi-structured data from spreadsheets or Access, and unstructured data from PDFs and Word documents

Agile and mature migration procedure ensures no delays in a data validation process

Helps clients detect legacy data in a few days and perform data conversion in several weeks, instead of months, while meeting a typical Transition Services Agreement

Lets companies eliminate duplicates and create a consistent, valid database for smooth long-term business operations

The service maps obtained data to target ERP system and retains tables, then goes in hibernation till next time
